Subject: [External] Dominion Energy Net Metering Tariff

Commissioner Williams:

As a resident of South Carolina and District One, I urge you to reject Dominion Energy's proposal to impose fees on customers who have installed rooftop solar panels (Docket 2020-229-E). While I do not currently have solar panels, I am definitely considering them in the near future. Should Dominion's proposal pass, it would place such a financial burden on owner's of rooftop solar that I likely would not consider it any further. This of course seems to be what Dominion wants, to discourage energy independence among South Carolina residents, making all of us a bit more dependent on Dominion.

The solar energy industry in South Carolina is responsible for thousands of jobs and continues to expand as we move forward in developing alternatives to fossil fuels. Dominion Energy wants to hinder this development. Please do not allow them to do so.

Again, I encourage you to reject Dominion Energy's proposal to implement a tariff on customers who have installed rooftop solar panels.

Kind regards,

Cameron Garrett
